# BUCHAN'S EXCHANGE TABLES,

IN THREE PARTS,

EMBRACING

SIMPLE, RELIABLE AND ACCURATE FORMS FOR ORDINARY USE,

IN THE CONVERSION OF

STERLING INTO CANADIAN CURRENCY,

(AND VICE-VERSA)

ADVANCING BY EIGHTHS;

ALSO A COMPLETE SET,

SPECIALLY ADAPTED FOR LARGE TRANSACTIONS AT CLOSE RATES,

ADVANCING BY SIXTEENTHS,

AND

CALCULATIONS FOR TRANSACTIONS IN

AMERICAN OR DOMESTIC EXCHANGE,

AT BOTH DISCOUNT AND PREMIUM;

ALSO CONTAINING

TABLE OF BROKERAGES AND STERLING EQUIVALENTS OF LONG AND SHORT EXCHANGE  
IN CANADIAN AND NEW YORK SYSTEMS OF QUOTATIONS.

# EXPLANATIONS TO PART I.

## STERLING EQUIVALENTS

AND

# STERLING EXCHANGE TABLES,

ADVANCING BY EIGHTHS.

The intimate relations existing between the CANADIAN and NEW YORK markets for Sterling Exchange necessitate a convenient table showing at a glance the relative values according to the different systems of quotations. Such a table will be found on next page.

The Table of EQUIVALENTS of long and short Exchange, on the next succeeding page, will at once commend itself to the practical banker, and the Explanations at the head of the page will be found to thoroughly explain its use.

The STERLING CONVERSION TABLES, which follow, are pronounced to be the most complete yet issued. The system provides for conversion of any odd number of pounds up to £1000 at one glance, the units and tens being found in right and left-hand columns, and the hundreds at the top of the page. The same system is carried out in regard to shillings and pence, which will be found at the foot of the page, the pence in the right and left-hand columns, and the shillings at the top. The decimals are extended beyond the cents to allow for large amounts, so that £1000 or £10000 can be found from £100, £1500 from £150, £9700 from £970, &c., &c. A table of differences at  $\frac{1}{16}$  precedes these tables, by the use of which values can be found at fractions of  $\frac{1}{16}$  higher or lower than the given rate, if necessary. The range of quotations, viz.,  $6\frac{1}{2}$  to  $12\frac{1}{2}$  % premium—advancing by 8ths from  $7\frac{1}{2}$  to 11 %, and by  $\frac{1}{2}$ 's above and below these rates—will commend itself as being sufficient for all purposes, from the fact that the lowest average posted rate in New York in thirteen years was  $7\frac{3}{4}$  %, and the highest  $10\frac{1}{2}$  %.

Example: To ascertain the value of £978 11s. 2d. at  $7\frac{7}{8}$  %, see pp. 22 and 23, and find column of 900 and line of 78; thus

	£978	=	\$4688.96
Then under head of Shillings and Pence, at foot of			
page, find column of 11 and line of 2; thus,	11 2	=	2.67
Result:	£978 11 2	=	\$4691.63

For conversion of Canadian Currency into Sterling, it is only necessary to glance over the page until the eye lights on the amount nearest below the sum desired to convert, which will give the full amount in pounds, and the difference subtracted will be the shillings and pence.

Example: To ascertain the value of \$4753. $\frac{19}{100}$  at  $7\frac{7}{8}$ , see pp. 22 and 23. The next lowest amount will be found to be

	\$4751.29	=	£991 0 0
and the difference	1.90	=	7 11
Result:	\$4753.19	=	£991 7 11

Nothing can be simpler than this; and a short acquaintance with the form will secure great speed in this mode of conversion.

## STERLING EQUIVALENTS.

## Canadian into New York Rates, and Vice-Versa.

(ADVANCING BY 16ths).

Canada into New York.		New York into Canada.

# STERLING EQUIVALENTS.

## DISCOUNT to be added to 60 DAY RATE

TO ASCERTAIN VALUE OF

## SHORT EXCHANGE or CABLE TRANSFERS.

EXAMPLE.—To find the value of a 30 days sight bill when 60 days exchange is quoted 4.86, and rate of discount in London is 3%, find the line of 3% at left hand side of table below, and add the decimal found in 30 days sight column, thus—60 days sight..... 4.86

30 “ “ ..... .0120

Value of 30 days sight bill..... 4.8720

In the same way 45 days will be 4.8660, 3 days, 4.8828, cable 4.8900, etc., etc.

Should the rate of discount be at a smaller fraction than  $\frac{1}{4}$  of 1%, add or deduct the decimal for discount rates of  $\frac{1}{8}$  and  $\frac{1}{16}$  as the case may be, as found in first two lines of the table.

12 days are allowed for remittance and acceptance ; allowance is also made for 3 days' grace.

Rate of Discount in London	45 Days Sight.	30 Days Sight.	15 Days Sight.	3 Days Sight.	On Demand.	Cable Transfers.

## EXPLANATIONS TO PART II.

# STERLING EXCHANGE TABLES,

ADVANCING BY SIXTEENTHS.

The following Sterling Exchange Tables have been compiled in the belief that they will fill a long existing want felt by bankers and business men who are dealing in large amounts. They are put in what is believed to be the most concise and convenient form, each sheet embracing eight rates, which is at once a great saving of space; and the range of quotations, viz.,  $5\frac{1}{16}\%$  to  $12\frac{1}{2}\%$ , will be found amply sufficient for all practical purposes.

For conversion of Sterling into Dollars and Cents, the arrangement of the form is from £100 to £10000 (£100 to £5000 on left-hand, and £5100 to £10000 on right-hand side of each sheet); but by a removal of the decimal points the amounts can be readily adjusted to units and tens, or hundreds if desired; thus, £5100 at  $8\frac{1}{8}\%$  = \$24607.50, £510 = \$2460.75, £51 = \$246.07, and £51000 = \$246075.00. The arrangement of shillings and pence is from 1 to 15s. on left-hand, and the balance of shillings and pence on right-hand side at foot of each column.

Example: To find value of £7561 17s. 2d. at  $8\frac{1}{8}\%$  (see pp. 94 and 95):—

£7500	=	\$36312 50
61	=	295.34
17s.	=	4.11
2d.	=	.04
<hr/>		
Result: £7561 17s. 2d.	=	\$36611.99

A short table is added for converting Dollars and Cents into Sterling, in which the range of quotations is shortened as much as possible, but is believed to be adequate to the requirements of these tables, which are not so much used. The form is necessarily different from that in the preceding tables, but will cover any amount from \$1 to \$10000. The amounts advance by units from \$1 to \$10, and by tens from \$10 to \$10000, giving up to \$500 on left-hand side and from \$510 to \$10000 on right-hand side of each sheet. It will be observed that while there are eight rates to a page for Dollars, only one rate is given for Cents (viz., 1c. to 49c. on left-hand and 50c. to 99c. on right-hand side of each sheet), as a variation of  $\frac{1}{2}\%$  in the rate will not make a difference of over  $\frac{1}{4}$  of a penny on \$1.

Example: To find value of \$897.33 at  $9\frac{5}{8}\%$  (see pp. 112 and 113):—

\$890	=	£183 3s. $9\frac{3}{4}d.$
7	=	1 8s. $9\frac{3}{4}d.$
.33	=	1s. $4\frac{1}{4}d.$
<hr/>		
Result: \$897.33	=	£184 13s. $11\frac{3}{4}d.$

## EXPLANATIONS TO PART III.

### AMERICAN OR DOMESTIC EXCHANGE TABLES,

AND

BROKERAGES OF  $\frac{1}{32}$ ,  $\frac{1}{16}$ , AND  $\frac{1}{8}$  OF 1 % FOR STERLING AND AMERICAN EXCHANGE.

These tables present an entirely new feature, and are nothing more nor less than a set of calculations for transactions in Exchange on New York or other important American cities.

The arrangement of the form is by thousands, from \$1000 to \$100000 (\$1000 to \$50000 on left hand and \$51000 to \$100000 on right-hand side of each sheet); but by a removal of the decimal point the amounts can be adjusted to units, tens, or hundreds; thus, \$45000 at  $\frac{3}{16}$  premium = \$45084.37, \$4500 = \$4508.43, \$450 = \$450.84, and \$45 = \$45.08.

Example: To find value of \$13000 New York draft at  $\frac{3}{16}$  discount (see pages 120 and 121) :—

$$\$13000 \frac{3}{16} = \$12975.62$$

$$\$1300 \frac{3}{16} = \$1297.56$$

To find the value of \$41000 New York draft at  $\frac{9}{16}$  premium (see pages 126 and 127) :—

$$\$41000 \frac{9}{16} = \$41230.62$$

$$\$4100 \frac{9}{16} = \$4123.06$$

The Brokerages will be found of great use in the handling of large amounts where the assistance of a broker is required. The same system as in the preceding tables is carried out, Sterling Exchange in amounts from £100 to £10000 on left-hand and American Exchange in amounts from \$1000 to \$100000 on right-hand sheet.

Example: To find Brokerage of  $\frac{1}{32}$  on £5000 (see page 128) = \$6.94.

To find Brokerage of  $\frac{1}{16}$  on \$100000 (see page 129) = \$31.25.
